

CTERA Partner Certification

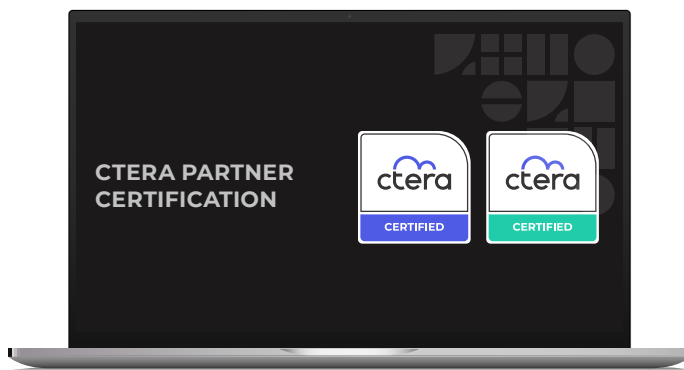

CTERA Partner Certification enables you to present CTERA solutions to clients looking to modernize their unstructured file infrastructure. With CTERA, organizations can use any cloud, private or public, to provide infinitely scalable, secure, and cost-effective file storage.

The CTERA Partner certification currently contains two tracks – Product Overview Track and Technology Track.

In the **Product Overview track** you'll be introduced to the CTERA solution, the use cases, how to present and position it to your customers. In the **Technology track** you'll get a deeper dive into the Product technology and the platform workflows. What can be and is being done by CTERA customers these days and how it's being achieved technically speaking.

CTERA Partner Training Overview

- **Available Online** – The training materials and exams are available online, allowing you to have instant access and take your certification at your convenience.
- **Free** – There are no additional costs to take the course; it's completely free!
- **Minimal Time Commitment** – You can complete each training track and exam in less than 1 hour.
- **Solution Overview** – Learn about the entire CTERA File Services Platform in one training. Product Overview
- **Solution Technology** – Get an in depth look into the platform architecture, technology and workflows. Technology
- **Use Cases** – Learn ideal use cases of where and how to position and sell CTERA. All Tracks
- **Case Studies** – Learn why and how existing customers deployed CTERA. All Tracks

To register for the CTERA partner training in one or both of the tracks, fill out the form on <https://www2.ctera.com/partner-certification>
